Skills & Traits

Resourceful and unrelenting problem solving
 Top 1% IQ (according to MENSA)
 Analytical thinking and process optimization
 Perpetual learning drive
 Interpersonal & communication skills
 Formal written correspondence
 Care

Technology, Frameworks, Tools

PHP	JavaScript
Java	HTML
Groovy	CSS
MySQL	Git
Laravel	Vue
Grails	jQuery
Spring	React Native
Hibernate	Cordova
AI	p5.js
	Processing

Engineering Ethos

Strongly driven to write code that is as **human-readable and understandable** as possible, striving to make life (and work) easier for the future programmer who inherits it.

Superpowers

Unrelenting, out of the box problem solving

Keen and natural observer, noticer of patterns, imperfections, issues, and potential issues

Hearing between the lines; spotting misunderstandings people are not actually aware of

Automatically creating and optimizing procedures

Professional and impactful writing

English Language

Never officially tested, equivalent to at least the C1 level.

Lazar Ika, MPharm

Summary

Highly motivated, dedicated, resourceful, optimal-solution-seeking, good-spirited, pattern-spotting, forward-thinking, inquisitive, fast and **always learning** software engineer, enjoying solving problems and seeing fruits of his creativity and labor **work!** :D

Work Experience

Oct. 2020
– present

Software Developer “Piktogram studio”, Belgrade

DAMAGEiD (backoffice) - Grails 4 full stack web app (large-scale; US based client)

Groovy, Java, MySQL; a few assignment examples, alongside CRUD:

- . create a page accessible to super admin, listing cases with S3 and DB photo numbers, checking discrepancies and fixing them;
- . create API endpoint and logic for uploading photos to AWS S3;
- . create API endpoint and logic for listing and updating entities (with documentation);
- . handle specific image caching, local and on AWS CloudFront;
- . generate dynamic thumbnails using significant letters of labels (data from the DB);
- . annotate images using coordinates from the database;
- . edit JasperReports elements, generate PDF, share via email;
- . custom position silhouettes and sample images (videos, with client's permission);

Charge&GO suite (backoffice & client web app) - Laravel 9 full stack web apps (large-scale; MySQL) - CRUD; views, validation, controller and service logic, APIs;

- Convert an existing PHP web app to **Laravel 8** (app using **MySQL**);
- **Vue app** maintenance, fixes and improvements;
- **WordPress plugins**: custom door design tool; [generate PDFs](#) from GET parameters and attach them to Contact Form 7 emails; [documentation and publishing](#);
- **React Native**: web conference app prototype; Charge&GO mobile app publishing;
- Build an Android game using **Cordova** and **Processing** -> **p5.js** :D
- Android app edits: new layouts, functionality, and localization

Professional Experience in the Field of Pharmacy

I firmly believe it is relevant because **it made me**. And my accomplishments and relations tell a story about me as a colleague, a leader, and an employee.

The fact that the large pharmacy I was in charge of as a **Pharmacy Manager** had annual revenue growth **2.7 times greater** than the average, shows that I can organize a large system, handle multiple different intellectually highly challenging duties, analyze and optimize processes, be a good mentor, motivate a group of people to function as a family, and provide high quality, client-centered service.

The fact that I spoke to and tried to solve problems of tens of thousands of patients as a **Pharmacist** taught me how to “read minds” ;) and made me highly apt to spot misunderstandings in communication, both with personal engagement, and between other people. Both very useful.

The fact that I was chosen by colleagues to be a **Member of Pharmaceutical Chamber of Serbia Assembly** and **President of the Court of Honor**, shows the esteem in which my colleagues see me, based on the experiences we had had together, and the contribution I made.

These experiences are highly relevant, and paint glimpses of a picture of me and the value I bring to a team, a project, people, work, and an organization.
