(Master of Pharmacy)

Summary

Highly motivated, dedicated, resourceful, optimal-solution-seeking, good-spirited, pattern-spotting, forward-thinking, inquisitive, fast and **always learning** software developer, speaking **Java**, **Groovy**, **JavaScript, MySQL**, **HTML**, **CSS**, and a bit of **PHP**, enjoying seeing fruits of his labor **work**! :D

Work Experience

Oct. 2020 – present

Software Developer   *"Piktogram studio", Belgrade*

- Grails 4 Web App (large-scale; using MySQL DB)

  . create a page accessible to super admin, listing cases with S3 and DB photo numbers, checking discrepancies and fixing them (recent complex feature, very proud of it);
  . create API endpoint and business logic for uploading photos to AWS S3;
  . create API endpoint (and logic) for listing and updating entities (with documentation);
  . handle specific image caching, local and on AWS CloudFront;
  . generate dynamic thumbnails using significant letters of labels (data fetched from the DB);
  . annotate images using coordinates from the database;
  . edit JasperReports elements, generate PDF, share via email;
  . add new list filters;
  . and many, many more; it is hard to keep track since tasks are getting larger and more plentiful... this is regular work now. :)

- Laravel 9 Web App (large-scale; using MySQL) - CRUD; views, validation, controller logic, APIs;

- Maintain a **Vue** app;
- Convert an existing small PHP web app to **Laravel 8** (app using **MySQL** database);
- Build a web conference app prototype in **React Native**;
- Build **WordPress plugin** generating PDFs from GET parameters and attach them to Contact Form 7 emails.

Oct. 2020 Jan. 2021

Software Developer – Intern   *"Piktogram studio", Belgrade*
- Build an Android game using **Cordova** and **Processing -> p5.js** :D
- Android app edits: new layouts, functionality, and localization

Jul. 2014 May 2019

Professional Experience in the Field of Pharmacy
I firmly believe is relevant because *it made me*. And my accomplishments and relations tell a story about me as a colleague, a leader, and an employee.

The fact that the large pharmacy I was managing had annual revenue growth **2.7 times greater** than the average, shows that I can organize a large system, handle multiple different intellectually highly challenging duties, analyze and optimize processes, be a good mentor, motivate a group of people to function as a family, and provide high quality, client-centered service.

The fact that I spoke to and tried to solve problems of tens of thousands of patients taught me how to read minds ;) and made me highly apt to spot misunderstandings in communication, both with personal engagement, and between other people. Both very useful.

The fact that I was chosen by our headquarters to be an *Article registry team*

member shows that my IT aptitude was always being used and recognized.

The fact that I was chosen by colleagues to be a member of *Pharmaceutical Chamber of Serbia Assembly* and President of the *Court of Honor,* shows the esteem in which my colleagues see me, based on the experiences we had had together, and the contribution I made.

I think these experiences are highly relevant, and paint glimpses of a picture of me and the value I bring to a team, a project, people, work, and an organization.
